# SQLGenie - AI-Powered Database Assistant

Your Database Wish is Our SQL Command

## Ask Your Database Question

Ask in natural language (e.g., 'Show me the top 5 most rented films')

List all customers who rented films in July 2005.

Generate SQL

Clear

## Generated SQL

```
SELECT DISTINCT c.first_name, c.last_name
FROM customer c
INNER JOIN rental r ON c.customer_id = r.customer_id
WHERE strftime('%Y-%m', r.rental_date) = '2005-07'
```

## Results Explanation

The query identified 599 unique customers who rented movies during July 2005. The sample data shows a subset of these customers, illustrating the variety of names. This indicates a substantial number of rentals occurred that month. Further analysis could reveal popular film genres or rental patterns among these customers.

599 row(s)

first_name	last_name
JAIME	NETTLES
GLENDA	FRAZIER
PAMELA	BAKER
MILDRED	BAILEY
EDUARDO	HIATT
SUSAN	WILSON
